

CPS COLLEGE STARTER PACK

The CPS starter pack contains all the tools you need to start teaching with our new Colour Placement System. This also includes a step-by-step DVD that will enable the Teacher to fully understand the fundamental principles of the Colour Placement System.

When we sell our CPS product to Colleges, we tend to do this based upon a class of 5 students being taught at one time.

Therefore, when buying our product with a view to using this as a teaching tool within the College environment, the following items should be bought:

One CPS Starter Kit for the teacher to use, plus Five Student boxes.

Included in each Student box is:

- | 1 workbook,
- | 1 set of Twisters,
- | 1 set of Shaders,
- | 2 Hooks, 1 Twin Tail comb,
- | 5 Elastic bands,
- | 1 Client Record card Pad and a stock of 250 papers (5 different sizes) to share between the group of 5 students.

This will give you the complete starter kit and you will only need to replace the colour guards and workbooks. A stock of 250 papers (5 different sizes) to share between the group of 5 students.

All CPS College Kits include one free certified Tacher Training course at CPS Academy, Hastings, East Sussex, UK.

Training can also be arranged in-house. Please call for more information.

CPS student kit including advance student manual

Academy use only. Not for resale. For professional use.
